Public Meeting – Storm Sewer Management System

Began 6:30pm Adjourn 7:00pm

Meeting Minutes

In attendance: Mayor Latta, Administrator Murray, Mygrant, Myers, Clark, and Cary. Also in attendance was Utility Clerk Haas, 2 representatives from Peterman Associates, and 1 visitor Nancy Dysinger.

Mayor Latta began the meeting with history on the Village of McComb's storm water system. Four years ago Northwest Water Sewer District took the water management and company. They did not take over the storm water system but the village did not have a way to bill for the storm system. The village would put aside 75k of the general fund for the storm water infrastructure but this was taking away from other projects and village needs. The current storm water lines are from 1934. The village brought in Peterman Associates for consulting and to develop a plan on the areas in need of infrastructure rebuild. Peterman Associates identified 7 major areas with a total of 24 projects. The total project is projected to cost around \$11.1 million over a couple of years. The billing would be \$5.00 per ERU (equivalent residential unit) a month. The village is currently investigating ways to bill this; through tax assessments or by monthly billing statements. The billing will start in July. The billing amount will be based on the volume and size of the property measured in ERUs. Each has a set rate, but the business vary one to the other. The payments will have their own account and not accumulate in the general bank account. Maps were provided with the major locations. Mentions of starting with a project on South Street.
